

Sacramento City Unified School District
Special Board of Education Meeting
March 25, 2021 Public Comments

Name: Janessa Stewart

Comment Our schools need to be open at least 4 days a week!

The vast majority of Teachers and Staff in our district have been vaccinated against Covid-19. Many high need individuals have had to wait months longer while healthy teachers in their 20's and 30's were vaccinated

Comment: Please consider adding more instruction to the MOU regarding the safety of the schools and the health of the staff and students. The MOU should include a plan for how the schools will be reopened and how the health of the staff and students will be protected. The MOU should also include a plan for how the schools will be monitored and how the health of the staff and students will be protected.

Comment: Please update our return to school plans to be in line with the most recent guidelines from the CDC. There is no reason that the 6ft guidelines should continue to be followed. It has been proven from the CDC that 6ft is not

Comment: The MOU is insufficient. It is not based on science or the CDC's recommendation. The substance of the MOU has been negotiated for several months, and as such it was outdated the moment it was announced. This MOU states that if any provision conflicts

Safely Reopen Schools

Comment: Please consider opening 5 days a week, or at the very least do not require kids to be on zoom while in person. There is NO scientific reason for kids to not use paper and pencil, etc. Over the summer it was determined the transmission of covid is NOT from surface to surface. All desks can be present in the classroom so that kids can leave materials inside and not have to bring them home. The excuse that kids will touch items not belonging to them is utterly ridiculous. One covid is not spread that way so who cares

And two, kids don't sit on other students desks. Please stop focusing on items that are a waste of time.
