Background/Rationale: Data informed decision making is essential to meeting our LCAP goals in SCUSD. Data driven or informed decision making is a process which relies on factual information to make choices on what to teach and at times, how to teach a concept or idea. Data informed decision making has been a critical mindset in education since the No Child Left Behind Act (NCLB) providing guidance to educators to adjust teaching strategies, as well as monitor and assess the effectiveness of programs used at sites and/or by the district.

LCAP Goal(s): **Goal 1:** 100% of SCUSD students will graduate college and career ready with a wide array of postsecondary options and a clear postsecondary plan. Growth in Graduation Rate and College/Career Readiness will be accelerated for Students with Disabilities, English Learners, African American students, American Indian or Alaska Native students, Hispanic/Latino students, Native Hawaiian or Pacific Islander students, Foster Youth, Homeless Youth, and other student groups with gaps in outcomes until gaps are eliminated.

Goal 2: Provide every SCUSD student an educational program with standards-aligned instruction, fidelity to district programs and practices, and robust, rigorous learning experiences inside and outside the classroom so that all students can meet or exceed state standards.
